

Annual Report on Enforcement of the Internet-Enabled Devices Policy

School Year 2025-26

Purpose

Success Academy Charter Schools – NYC publishes this report under New York Education Law § 2803, which requires each charter school to report annually on its website on enforcement of its policy on student use of internet-enabled devices during the prior school year. This report covers the 2025-26 school year and applies to all Success Academy schools in New York City.

The Policy

Scholars may bring cellphones and smart devices (i.e. Apple Watches) to school, but they must be stored away and not used during the school day, including during transitions. This policy supports a focused learning environment free from distractions. Devices will be stored in backpacks, lockers, lockboxes or SA-provided pouches, depending on the school model. For safety, scholars in grades 8-12 may take their devices during off-campus lunch. All devices will be returned to scholars before dismissal. To reach a scholar during the school day, please contact the Main Office.

Disciplinary Action for Non-Compliance

During the 2025-26 school year, no students at any Success Academy school in New York City faced disciplinary action for non-compliance with the policy.

Demographic Data and Disparity Analysis

Because no students faced disciplinary action for non-compliance, there is no demographic data to report and no disparity in enforcement to analyze. No mitigation action plan is required.
